Harvest 2008: Harvest is underway but a bit later than usual in most areas.

PA - Quality is good; volume likely to be to estimate; will finish this week.

SW MI - Quite a few growers picking lighter than estimate; recent storms and winds presented some challenges to fruit quality.

WC MI - Just getting started.; only a small volume of fruit harvested last week; hard to assess quantity or quality at this stage.

NY - They have started harvest; likely to be at estimate; some wind whip but otherwise quality is good.

WA - Also just getting started.
