Harvest for 2013 has begun! It is great to have a good sized crop of cherries so that we can refill the cupboards.

SW MI - Growers are in full swing with harvest. Cherries look good and quality is quite good. Some already suggest that the crop will go longer than estimate.

PA - The cherries are looking pretty good. They have been harvesting for a few days now. It is anticipated that PA will be pretty close to estimate.

Other areas - No other districts harvested in week 1. Input from various people is that WC MI, NY and OR will all begin harvest in week 2.
