Total	79.3	262.	7.5	283.6	209.6

Harvest 2009:

NW MI - Harvest is still going quite strongly. Thoughts are that harvest will continue at least through two more weeks. NW MI has had rains which are adding to weight and affecting quality. Diversion volume will increase.

WC MI - Harvest is almost complete for WS, but a bit more will come in. More diversion tonnage will get posted.

SW MI - Harvest is over.

NY - Harvest is done. Exceeded est.

UT - Excellent quality. Will exceed est. Expect more diversion volume.

WA - Production is done.

WI - Quality very nice. Some rains in area will add volume. Expect harvest for another two weeks.
