Total	12.56	78.36	70.0	111.9%	231

OR continues its harvest. The cherries have held up quite well throughout. Harvest conditions have been very good.

UT also continues with its harvest, but it is on the downward slope of this year's production cycle. We can expect additional reports for Week 8, but production should taper off quite a bit. The quality has been holding up quite well.

WA, like UT, just completed its 4th week of harvest. It, too, appears to be on the downward side of production cycle. WA will need to exceed their production from their first two weeks of harvest to reach their estimate.
